

The Requisition Pack contains:

Patient and Healthcare Provider Instructions
ClarityDX Prostate® Requisition Form LifeLabs
Laboratory Requisition Form for Ontario

PATIENT INSTRUCTIONS

1. Print the ClarityDX Prostate Requisition Form and the LifeLabs Requisition Form.
2. Bring both printed requisition forms to your healthcare provider for them to complete.
3. Book an appointment at any LifeLabs sample collection site by visiting www.lifelabs.com for locations, hours of operation, and appointment-only centres.
4. Take the completed requisition forms and either the online payment receipt or the completed Payment Authorization form if purchasing offline, with you to your sample collection appointment.
5. The test results will be sent to your healthcare provider within ten (10) business days.
6. Reach out to your healthcare provider to discuss the results of your test.

NOTE: You may be eligible for reimbursement through your employer's health spending account.

CHECKLIST FOR HEALTHCARE PROVIDERS

1. Complete the patient information, physician information, and clinical information sections of the ClarityDX Prostate Requisition Form.
2. Fill out the Patient and Provider sections of the LifeLabs Requisition Form.

NOTE: Patient fasting is not required before the ClarityDX Prostate test.

ClarityDX Prostate® Requisition Form

Scanning Label or Accession # (lab only)

Nanostics 1-800-672-2027

**** TEST ELIGIBILITY: Patient must not have been previously diagnosed with prostate cancer and have not taken high-dose biotin therapy (>5 mg/day) within 8 hours of serum collection****
Complete the sections below with the healthcare provider. Choose only one check box where applicable.

ADDITIONAL INFORMATION

Test Overview

ClarityDX Prostate is a laboratory-developed test developed by Nanostics that combines the lab results of two biomarkers (total PSA and free PSA) and at most five clinical features (age, previous negative prostate biopsy status, digital rectal exam findings, prostate volume, and PI-RADS) to calculate the risk of having clinically significant prostate cancer, defined as Gleason Grade Group 2 or higher, on prostate biopsy. This risk probability is provided as a Risk Score which ranges between 0.1% to 99.9%. ClarityDX Prostate is a minimally invasive test indicated for use by healthcare providers as an additional tool to aid in the decision for more advanced procedures such as diagnostic imaging or prostate biopsy.

Test Eligibility

Patients have not been previously diagnosed with prostate cancer and have elevated PSA levels. Patients are not on high-dose biotin therapy (i.e., > 5 mg/day). If the patient is taking high-dose biotin therapy, wait at least 8 hours from the last biotin administration before going to the blood collection site for this test.

Test Performance

Performance characteristics and Risk Score thresholds for each of the four ClarityDX Prostate models are displayed in the following table:

Predictive Model Name	ROC AUC	Threshold	Sensitivity	Specificity
ClarityDX Prostate + MRI + DRE	0.87	≥17	95	47
ClarityDX Prostate + MRI	0.87	≥17	95	45
ClarityDX Prostate + DRE	0.82	≥25	95	35
ClarityDX Prostate	0.80	≥25	95	32

Test Limitations

While the ClarityDX Prostate test is more accurate compared to PCPTRC and PBCG risk calculators for predicting clinically significant prostate cancer, the test may still provide false positive and false negative test results. The instruments used to acquire total PSA and free PSA may be sensitive to high biotin concentrations in the blood (>30 ng/mL) thus patients taking large amounts of biotin supplements may have inaccurate test results. Test accuracy may be influenced by PSA-altering drugs such as 5-alpha reductase inhibitors.

The performance characteristics of ClarityDX Prostate were determined by Nanostics in a population primarily between 40 to 75 years of age with PSA ≥3 ng/mL. Extensive evaluation of this test outside of these ages and PSA values has not been performed by Nanostics. Total PSA and free PSA tests are indicated for men ≥50 years of age; caution is required when interpreting individual total PSA and free PSA results in patients below 50 years of age. Patient management should be based on holistic clinical judgment. This test has not been cleared or approved by the U.S. Food and Drug Administration (FDA) or Health Canada.

Sample Handling

Collected blood samples will be separated into serum which will be used to perform total PSA and free PSA tests and the results are used for the ClarityDX Prostate test. No other tests will be performed with the patient's serum samples other than those authorized by the patient's healthcare provider. Nanostics may use a referral laboratory to perform the total PSA and free PSA tests. The referral laboratory will be evaluated for quality using Nanostics' supplier approval process to ensure test results can be trusted. Referral laboratories will be located in Canada to ensure that samples do not cross international borders.

Information Handling

Patient and physician information collected for the ClarityDX Prostate test will only be used to generate and evaluate ClarityDX Prostate test results. Information will not be provided to other parties without the consent of patients and physicians. All collected data for ClarityDX Prostate tests will reside within Canada. Nanostics' privacy policy may be accessed from Nanostics website (www.nanosticsdx.com) or by contacting Nanostics at info@nanosticsdx.com.

Test Result Disclosure

ClarityDX Prostate patient reports are only sent to the ordering healthcare provider. Forwarding patient reports to other physicians or patients is the responsibility of the ordering physician. Test results will be available within 10 business days.

Patient consent

By completing and submitting this ClarityDX Prostate requisition form to a blood collection site, the patient is providing implied consent that they understand the information on this requisition form and allow Nanostics to perform the ClarityDX Prostate test on their data.

Questions or Complaints?

Please contact Nanostics by phone at 1-800-672-2027 at extension 1 or by email at info@nanosticsdx.com during Clinical Laboratory hours of operation which are Monday to Friday from 9 a.m. to 5 p.m. Mountain Time.

Samples can be collected any day of the week.

Patient will not present with a kit. Use LifeLabs supplies.

Process sample WITHIN 2 HOURS of collection.

Collect one (1) SST. Allow blood to clot and then centrifuge.

Complete date and time of collection on the ClarityDX Prostate Requisition.

Aliquot serum into 2 aliquot tubes and freeze samples.

Label tubes with patient's name and DOB.

Forward frozen samples to IRL with contract requisition, ClarityDX requisition and payment authorization.

Instructions for IRL Specimen Management

Ship samples on dry ice using 3rd Party FedEx account # 693074274. Provide Contract Services with the FedEx tracking number.
